

PUBLIC NOTICE
 CUSTOMERS OF Mount Vernon
 FAILURE TO MEET MICROBIOLOGICAL MONITORING REQUIREMENTS
 FOR DRINKING WATER-SOURCE WATER

Este informe contiene información muy importante sobre su agua potable. Tradúzcalo o hable con alguien que lo entienda bien.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During September 2015 we had sample(s) that tested positive for total coliform bacteria and we did not test our source for fecal indicators, therefore we cannot be sure of the quality of our drinking water during that time.

This is a violation of Missouri Public Drinking Water Regulations. The Missouri Department of Natural Resources requires that drinking water be tested for fecal indicators at the source (well) if total coliform bacteria is detected in the distribution system, by submitting at least one valid sample per source. Bacteriologically-contaminated water can cause a variety of disease symptoms. It is important that drinking water be routinely tested to ensure the safety of those who consume it.

This is not an emergency. If it had been you would have been notified immediately. Total coliform bacteria are generally not harmful themselves. Coliforms are bacteria which are naturally present in the environment and are used as an indicator that other, potentially-harmful, bacteria may be present. People with severely compromised immune systems, infants, and some elderly may be at increased risk. These people should seek advice about drinking water from their health care providers.

Provide explanation of cause of monitoring failure:

Repeat Sample taken 10/9/2015; but failure to take sample at required ground water source due to miscommunication on City's part with representatives with MDNR

For more information, please contact water system staff indicated below:

Gene Stanton at 417-466-2168 or PO Box 70 Mt. Vernon, MO 65712
(name of water system contact) (phone number) (mailing address)

Additionally you may contact the Missouri Department of Natural Resources' Southwest Regional Office at 417-891-4300 or Public Drinking Water Branch at (573) 751-5331.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

This notice is being sent to you by Mount Vernon
 State Water System ID#: M05010553.
